

Citroen Hydraulic Pipe Flaring Tool

The original and the best

Available for 3.5mm and 4.5mm Pipes

Here at Pleiades we have been making our flaring tool for over 20 years, our flaring tools, pipes fittings and seals have been used to re-pipe and repair thousands of Citroens worldwide

Until Pleiades developed our pipe making system, the only way to replace a pipe on a Citroen was to buy the pipe complete from the dealers, this means ordering then waiting a day or so for it to turn up, then finding that you have the wrong pipe and starting over again. Well not any more, with a flaring tool, a roll of pipe, a bag of fittings and some seals you have all the pipes in stock, simply make them up.

The pipe has the benefit of being cupro-nickel so it will not rust and we give our pipe a vehicle life warranty against corrosion. The pipe ends (male fittings) are the correct thread for the car but have the added benefit of a 10mm hex to drive them. Female couplings are available to create joins in the pipework where needed. Seals are also available.

At Pleiades we have the complete Citroen pipe making system.

About Pleiades. (eBay seller "citrobits")

Pleiades was formed in 1980, then the main part of our business was reconditioning spheres, mainly for the DS, SM, GS/A and the CX. Later along came the BX, XM and Xantia.

As time moved along we started to overhaul Steering Racks, Pumps, Height correctors and anything else that the hydraulic fluid ran through.

Of course you can also contact us for any hydraulic part for your Citroen, modern or vintage.

Our Flaring tools are priced at £56.00 + vat each

We also run a free information service on 01487 831239

If you have a hydraulic problem, if nobody else can help, maybe you should try the Pleiades team!

Postage

The flaring tool is sent out at cost postage

We are a UK VAT registered company, so we have to charge 17.5%vat on all of our sales, this includes the postage.

A full VAT receipt will be sent with the parts.

Payment.

You can phone us direct on 01487 831239 and pay, we accept most major credit / debit cards.

We also accept cheques. (£56 + 4.50) x 1.175 = £71.09 total cost)
